Circuit —
everything your teams need to communicate in a single app
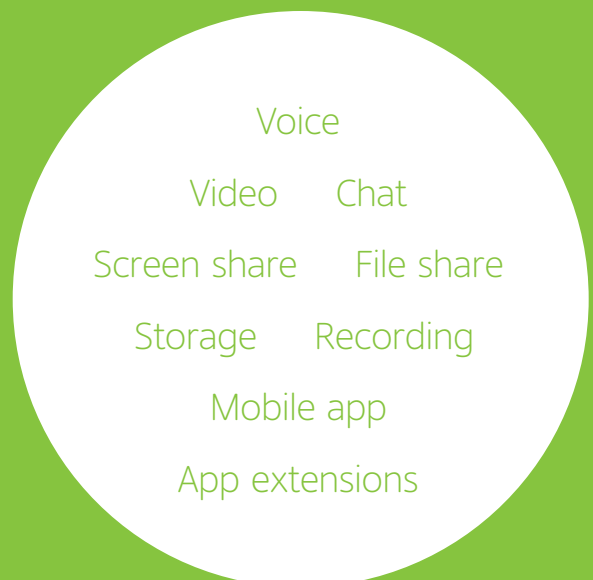

Make your team*work* better.

circuit
by unify

One easy tool

Circuit improves teamwork by bringing voice, video, chat, screen share, file sharing and storage, into one app.

Circuit provides a better way to work. A far more efficient and effective way to collaborate, compared to today's silo'd applications. It's one tool, with all the capabilities you need to meet with your teams, have a quick call, exchange ideas, and share information.

Everything is together in a *single pane of glass*, making your collaboration experience easier and more productive.

Voice

Video   Chat

Screen share   File share

Storage   Recording

Mobile app

App extensions

Flexible choices for every business

- Unlimited users
- 20 GB storage
- Unlimited users per conference call

Circuit is available for ***free*** for *as long as you want*. And when you're ready to add more people, features, and storage, just contact us.

Teamwork is incredibly important for output, morale and retention. But for teamwork to be successful, it requires speed and accuracy. With Circuit, teams work together more efficiently. It's your virtual office making sure you and your teammates are always connected, regardless of where any of you are. It's easy to share your thoughts, review your work, and engage more naturally.
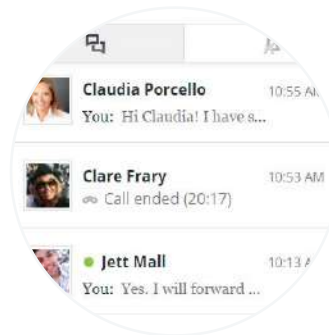

Have a conversation

Tired of tracking down all your communications for a specific topic or person? With Circuit, all you need is just one conversation. All your interactions, documents, and meetings are shared in one private, persistent conversation. Collaborate in whatever modality feels most natural - an impromptu video call, a quick chat, or simply share a file. Spend more time working, and less time tracking.

Creating

Connect with your teams

What's the best way to stay plugged in with the rest of the team? Start a Private Conversation and create a virtual meeting room for your project. Keep your meetings, projects and content all together in one place for everyone on the team.

You: Yes. I will forward ...	

Be open

When everybody in your company needs to be informed, start a Community conversation. Stimulate creativity and problem solving by sharing content and information that interests a larger community within your organization. Get rid of those silos, be open, and inspire everyone in your company to have a voice.
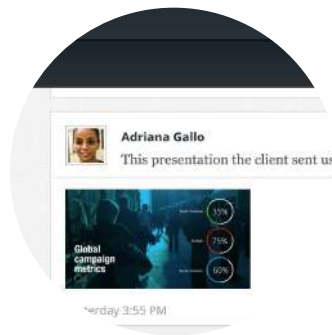

Be seen

Face-to-face meetings are a luxury these days. But Circuit's high definition video makes it easy to meet as naturally when you're apart, as when you're together. See and be seen by your distant colleagues and make your online meetings more personal and friendly.

Be emotional

Need to spark some excitement and emotion into your conversations? Get creative with rich text formatting such as bold, italics, highlights, and bullets. Or express yourself more freely and clearly with fun and professional emoticons.

- Include the right people in the discussion
- Learn from the knowledge of others
- Inspire broader thinking

Plug & Play

Circuit gives you plug & play connectivity to Box.com, Exchange contacts, Outlook, and traditional telephony solutions to improve workflows and productivity. This means easy file sharing from Box.com, access to Exchange contacts, linking Outlook meetings and emails to Circuit conversations, and having calls with people who don't have Circuit.

If you're a developer

As a software developer you can create your own plug & play extensions with all kinds of business, document, and messaging solutions. Plus you can use Circuit's robust WebRTC services such as HD video and audio conferencing in any application or web page. Circuit APIs are available to all independent software vendors, developers and system integrators on free sandbox tenants at developers.circuit.com.
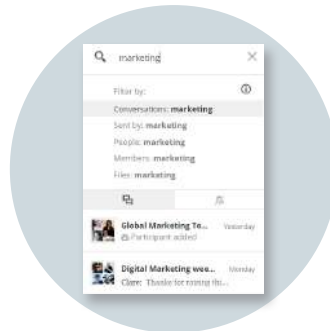

Are you spending too much valuable time looking for people, data and information? According to a workforce transformation survey conducted by technology analyst firm IDC, we spend 8 hours a week looking for people, 7 hours looking for data, and another 7 hours looking for information. That's 22 hours of unproductive low-value time! We can fix that.

Discovering

Searching

Knowledge shouldn't remain locked in folders. It should be shared and searchable, even after an employee has left your team or your company. With Circuit, it's incredibly easy to search and filter by people, messages, senders, members, conversations and files. Find what you need within seconds.

Organizing

In Circuit, all your relevant files and information are centralized and stored right within the conversation where they were shared. This way everything related to a project or topic stays within context. Now you can manage, track and organize content much more efficiently. Say good bye to project craziness.

Knowledge

Knowledge is everywhere in your company. But how does it get circulated? Circuit's Community conversations provide the easiest way for everyone in your organization to discover and learn. Start an engaging discussion around a topic that interests and benefits a lot of people. Or join an existing Community and discover the knowledge that's already there.

- Be more informed
- Respond faster
- Speed your time to market

Be social

Circuit is all the things you love about modern social collaboration in a secure enterprise app. It creates online communities and promotes cooperation, self-expression, interaction, feedback, opinion and idea sharing. You can like someone's comment, flag messages for follow-up, and set up voting to get others' opinions, plus more.

Circuit labs

Want to get a glimpse of what's coming soon? Try Circuit Labs. Simply enable it under your settings and start to play around with new experimental features. Give us your thoughts and be a part of our feedback loop to help make Circuit even better.

Whether you're working at home, in an office, or in a dispersed campus, Circuit stays with you. And if you use your PC, tablet or mobile device, your experience will always be the same.

Virtual teaming

Did you know that 75% of team members are distracted during virtual meetings? That's because they lack the tools to collaborate in a dispersed setting. Circuit's multi-media conversation thread and vibrant HD video keeps you from feeling disengaged or disconnected from the rest of the team. Start a chat, place a call, or turn on your video so you can smile at one another. Never again feel at a disadvantage for working remotely.

Moving

Locomote

Does telephone tag drive you crazy? Use Circuit's mobile app and make it convenient for others to reach you while you're mobile. Be a first responder and pick up on the first call. Let's put an end to trying multiple forms of communications when someone needs your help. Locomotion is easy with Circuit.

Use any device

• Web Browser – All you need is access to the internet. It's that easy.

• iPhone or iPad or Android – Download the Unify Circuit app and you're ready to go.

• Experiment Circuit from your apple watch.

Swipe your call

Need to move locations? Simply swipe from your PC to your mobile (or vice versa) and your call will move with you instantly. No more scrambling, no more interruptions and no more disconnects.
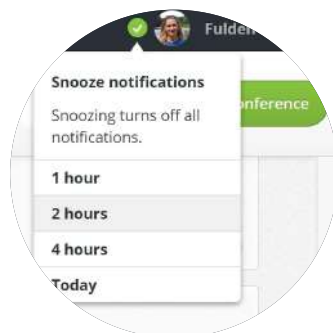

Join from any phone

Are you stuck in a place where you can't access Circuit? No problem. Join your Circuit meeting from any telephone by dialing into the dedicated Circuit audio conference bridge. With Circuit, there's no reason you should ever miss a call.

- Be mobile
- Be responsive
- Be available

Receive all your calls in Circuit

Do you want all your calls to go to Circuit? Our Universal Telephony Connector enables any SIP voice platform to connect with Circuit. This means you can receive calls made to your published business phone number in Circuit. Likewise, if you need to reach people outside of Circuit, simply type in their phone number.

Need a break?

Put yourself in snooze mode and let people know you'll *be right back*. Snoozing will temporarily disable all your notifications so you can focus on a task without interruptions - or so you can simply take a break. Set it for 1 hour, 2 hours, 4 hours or all day. If you get back early, simply resume.

Sharing inspires collaboration, and that's how we get things done. Whether it's a thought, an answer to a question, or a link to an interesting article, sharing is essential to great teamwork.

File sharing

It's super easy and secure to share files of any size from your PC or Box.com account. Simply click on the paper clip icon and select your file. After sharing, find them right where you left them in the conversation feed, or simply search.
Sharing

Meeting recording

Great ideas are shared during conference calls. But what if you missed the call? Record the call and capture it all for later viewing. Any participant can start, pause, and stop the recording as many times as they want, and everyone can see. There's no better way to manage your time while keeping up with projects.

Screen sharing

Why mess with a separate web conferencing app when you can screen share in Circuit at no additional cost? While you're meeting in Circuit, you can share your entire screen, an app or just one file. No more pass-codes or downloads. Circuit is productivity at its best.

Always-on storage and history

Circuit keeps everything stored and contextually rooted to your conversations. It groups and organizes all your information and interactions chronologically at all times in the conversations where they happened. This includes your chats, videos, meeting recordings, and documents. Ideas and knowledge from past conversations are never lost, and everything is searchable in a matter of seconds.

Sharing with guests

Did you know that 48% of teams include external contractors, agencies, outsourcers and other third parties? Invite them to meet you in Circuit when travel isn't an option. Simply send them an invitation and they can join you in an engaging voice, video and screen sharing conference call.

- Make your meetings better
- Solve problems faster
- Communicate more clearly

Click-to-call your Exchange contacts

Because Circuit is centered completely around your relationships, it's easy to contact them from your Exchange contact list. All it takes is connecting to your Exchange account and entering in your server address from your Circuit settings.

Everything is secure

You wouldn't have it any other way. Circuit is a highly secure, public, multi-tenant cloud offering. It relies on a secure web browser for connection to the cloud, and the browser uses the WebRTC protocol for real-time communications sessions. All your conversations with other Circuit users are encrypted and secure.

Circuit brings voice, video, screen share, chat, and file sharing into a single view.

It's natural conversations.

It's moments of insight.

It's everyone working together.

It makes your teamwork better.
